

In conjunction with our leadership work through the Holdsworth Center, district staff has spent the last year collaborating with various employee groups on the culture of the AISD. These discussions have formed the values as a district. These tenets are the foundation for all of us in the AISD and for all of our work to empower

We value and understand others by being open-minded and respectful.

We commit to learning and improving ourselves, each other and our work.

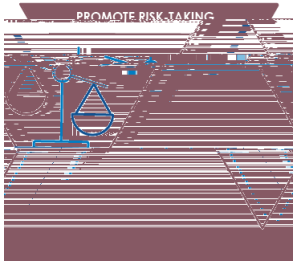

We improve outcomes by placing each learner's needs at the center of all actions.

With every encounter, we serve others and build relationships to reach positive outcomes.

We are all responsible and accountable for student success.

We are empowered to improve our areas of work.
